Objective :

Seeking an opportunity to work as a Software Engineer in a fast-growing organization having In-Depth knowledge on technologies like, React, ReactNative, Nodejs, Angular, TypeScript, JavaScript, Web Application Development, Mobile Application Development and MySQL server.

Work Experience :

- **5+** years of experience in Web and Mobile Application Development using React, ReactNative, Angular, TypeScript and Node Js technologies.
- Experience in web application development using NodeJs Framework : ExpressJs, SequelizeJs, **REST APIs**.
- Extensive design and programming experience in JavaScript, React, Bootstrap, html,css.
- Experience in writing Queries, Joins, Stored Procedures and Functions.
- Good knowledge on **OWASP** Secure Coding Practices.
- Knowledge on AWS EC2 deployment with PM2, cloud setup, configuration.
- Involved in identifying, debugging and fixing the production issues.
- Participated in code reviews, identified opportunities for code reuse, refactoring and unit testing.
- Part of the R & D team with good knowledge and Hands-on experience in designing and implementing **Creative solutions**.
- Following Agile methodology and Scrum/Kanban framework.

Professional Experience:

- Secureyes Techno Service Pvt., Bangalore as a senior software Developer : Sep 2023 - Present
- Data Labs Pvt. Ltd, Hdfc Life, Bangalore as a software Developer : July 2022 - July2023
- Acsia Technologies Pvt. Ltd, Thiruvananthapuram, Kerala as a senior software Developer : Sep 2021 - May 2022
- Ion idea Interactive Pvt. Ltd, Whitefield, Bangalore as a software Developer : Feb 2021 - Aug 2021
- Connecticut technologies Pvt. Ltd, Pune as a Software Engineer, Development. : 18 Jan' 2019 – Dec 2020

Technical Skills :

- Development Tools : Visual Studio Code, Microsoft SQL Server Mgmt Studio, SQLyog, pgAdmin4, WIndows Internal Tools
- Programming Language : C, C++, ReactNative, NodeJs ,ReactJs, Angular TypeScript, Java,
- Web Technologies :HTML,CSS,Bootstrap,RESTful Web APIs (NodeJs, ExpressJs)

- Scripting Languages : JavaScript, jQuery, Angular 13.v
- Database : MySQL Server 5.5, Postgres
- Server: Aws, GCP cloud
- Source control systems : Github, TFS, SVN
- Operating System : Linux (RedHat, CentOS), Windows
- Monitoring Tool : ELK (elastic search, logstash, kibana)

Summary:

- Pursued Five Year dual degree Integrated Programme (B.E + M.tech) in Computer Science from UIT RGPV Bhopal.
- Strong grasp on OOP programming language concepts.
- Capable of grasping new technical concepts quickly and utilizing them in a productive manner.
- Ability to think clearly & logically using problem solving, presentation & communication skills.
- Develop and implement front-end web code and design standards and write clean code.
- Collaborate with senior management, designers and other project team mates efficiently.

Educational Background:

- I have post graduated from **University Institute of Technology Rajiv Gandhi Proudhyogiki Vishwavidyalaya Bhopal** (M.P.) in **2018** in Computer science & Engineering with a CGPA of 6.5.

Actuaries:

I have done basic actuaries courses offered by **University Institute of Actuaries**. They basically offer great insight into the Risk Management and Insurance domain.

Projects:

Projects in Secureyes Techno Service Pvt. Ltd. (From Sep'2023 – Present)

Project #1

Project Name : **RegTrac**

Technologies : Node(10v) , Angular(13v) , MsSQL, TypeScript, Aws, GCP Cloud

Project Description:

It's a software platform or product that helps regulatory authorities get a unified view of compliance against all regulatory standards and frameworks by the members within the sector.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Mentored junior members of the team by solving queries and clarifying the requirements to them.

Projects in Datalabs Pvt. Ltd. (From July '2022 – July 2023)

Project #1

Project Name : **Life Certificate**

Technologies : Node, Angular , Postgres, TypeScript, Aws, GCP Cloud

Project Description:

It's a software platform to check the liveness of a person or member who has taken term or policy insurance from the firm with the help of some security check and live video.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Mentored junior members of the team by solving queries and clarifying the requirements to them.

Project #2

Project Name : DIGIVPC

Technologies : React, Node, Postgres, TypeScript, Aws, GCP cloud

Client : HDFC LIFE INSURANCE

Project Description:

It's a software platform to check and verify the policy or term insurance holder by government authorized identity as aadhar card or pan card and to provide a better service.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Code reviewed for UMO-IQ.

Project #3

Project Name : Speech Analytics

Technologies : React, Node, Postgres, TypeScript, Aws, GCP cloud

Client : HDFC LIFE INSURANCE

Project Description:

It's a software platform to manage or to track the feedback of a conversation happened between customer care executive and customer regarding policies providing by company.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Code reviewed for UMO-IQ.

Projects in Acsia Technologies Pvt. Ltd. (From Sep '2021 – May 2022)

Project #1

Project Name : AutoSmact

Technologies : React, Python , Azure

Project Description:

It's a software platform of Trip management to collect vehicle diagnostic information using onboard

bluetooth device and aggregate vehicle information as navigation, message notification, weather forecast.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Mentored junior members of the team by solving queries and clarifying the requirements to them.

Project #2

Project Name : UMO-IQ

Technologies : Java, Angular,

Client : KPIT Technologies Pvt Ltd

Project Description:

It's a software platform to manage live tracking and to provide information of specific routes of specific vehicles and sharing information of those vehicles as well as local transport for better transportation of passengers.

Role & Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Code reviewed for UMO-IQ.

Projects in Ionidea Interactive Pvt. Ltd. (From Feb '2021 – aug 2021)

Project #1

Project Name : JobsnGigs

Technologies : Ionic React, PHP,

Project Description:

It's a software platform for employers and employees to share their details as per requirement for getting a job and seeking a job as to uploading the details of employee and vacancy in an organization. **Role &**

Responsibilities:

- Worked on creating project architecture and setting up a development environment .
- Creating UI and model of ionic react.
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Mentored junior members of the team by solving queries and clarifying the requirements to them.

Project #2

Project Name : KNSales

Technologies : Flutter, NodeJs, MySQL

Project Description:

It is a mobile application to make sales management work easier as to track from order placed to installed to a customer at their required place and keep track of all the activities from assigning tasks

to install and verify.

Role & Responsibilities:

- Developing and implementing backend functions and design standards.
- Was Involved in Creating RESTful APIs, Testing, deploying and customizing the Indexed Collection for different Language strings.
- Was involved in fixing bugs and errors reported after testing

Projects in Connecticut technologies Pvt. Ltd. (From March '2019 – Dec 2020) Project #1

Project Name : Medotrack (Connect2Health)

Technologies : ReactNative, NodeJs, ReactJs, SequelizeJs, MySQL, Nginx server, PM2(Process Manager),

Project Description:

It's healthcare software useful for hospitals and clinics to keep track of all the activities in the hospital by making doctors and hospital management work easier.

Role & Responsibilities:

- Worked on creating project architecture and setting up the development environment for node server. - Creating Rest API's.
- Discussed every aspect of a requirement with the Manager and participated in discussion regarding its feasibility and limitations .
- Mentored junior members of the team by solving queries and clarifying the requirements to them.

Project #2

Project Name : Altafy

Technologies : Angular 7, NodeJs, Postgres

Project Description:

Software Platform is for event organizer for Speakers to choose for a particular event as per their previous and current performance and helps in searching for s specific speaker

Role & Responsibilities:

- Developing and implementing backend functions and design standards.
- Was Involved in Creating RESTful APIs, Testing, deploying and customizing the Indexed Collection for different Language strings.
- Was involved in fixing bugs and errors reported after testing

Projects in Bees Synergy System Pvt. Ltd. (From Aug '2016 to Nov 2016)

Project #1

Project Name : Online Shopping Cart

Technologies : Struts, J2SE, J2EE (Servlet, JDBC), HTML, CSS, MySQL

Project Description:

This Web Application processes secure registration and profile management facilities for customers for easy access.

Role & Responsibilities:

- Was Involved in creating Web Application for generating user data for the Reports. Have created WebAPIs for handling Financial Expenditure data.

Training Underwent at Network labs India Pvt. Ltd. (From July '2018 to Nov 2018)

- Networking- router configuration, Telnet
 - LINUX , virtualization ,DBMS, ITIL
 - Windows server user management, ACL Permission
 - DNS,DHCP configuration
 - Servers-FTP, NFS, DNS, print server
 - Disk management-partition tools like fdisk, sfdisk etc. LVM- physical, logical
 - Package management –RPM & YUM – server command option for RPM & YUM •
- Given right permission to users, changed ownership of files @ directories,
- Backup & restore, compression utilizes
 - Failover clustering
 - Storage (SAN,NAS)
 - Troubleshoot and rectify the problem related desktop computer hardware

Declaration :

- I hereby declare that the above-mentioned are true to the best of my knowledge and belief.
